CASE STUDY
CENTRALIZED FRAMEWORK

The Business Situation

After a full assessment of the client done by CirrusLabs it was determined their software development processes were not efficient and information was not shared across various teams consistently. This resulted in:

The Client

Global Consulting & Professional Services Company

1. Increased rework
2. Project risk
3. Project Delays
4. Underutilization of resources and tools
5. Inconsistent templates and tools

Services Provided in Case Study

Enterprise Software

Cloud

Our Work

CirrusLabs worked with the client to provide a holistic solution for the client. The solutions which was co-created included:

✓ A portal which acted as a single pane of glass for creating development environments, cloud environments, artefacts.

✓ An end to end process with Gates to provide decision support for Project roll-outs.

✓ A centralized framework with predefined templates for consistent and fully automated process for Solution development.

✓ A compliance framework which builds compliance records for projects as it moves through the compliance life cycle.

✓ Predefined API based templates for every step of the development process.

✓ Predefined compliance and project environment scans

The Business Objective

Our client wants to roll out a centralized framework. Client reached out to CirrusLabs to lay out a centralized Framework which can automated end to end the SDLC from initiation to decommissioning of the project. By adopting the automation and enablers offered by the platform, application development teams will:

1. Save an enormous amount of time
2. Reduce operational risk
3. Avoid the guesswork involved with the software delivery process
4. Automate on-boarding of software development projects

About CirrusLabs

CirrusLabs is a management consultancy firm specializing in guiding medium-to-large scale organizations in their transformation to Continuous Business Value Delivery through use of lean thinking and agile frameworks.

The Outcome

Accelerators for development team

Integrated end to end pipelines

Standardized code scanning process

Integrated and automated compliance enablement
